Enrolment No:	92500588024		
Student Name:	REHAN KATIYAR		
Subject	DBMS-ii	Academic Year	2025-2026
Subject Code	05BS0204	Subject Type	Department level

Index

Sr. no	Details	Submission Date
1	Write a simple procedure without any parameter that shows user defined message on the screen. Call the procedure using separate PL/SQL block and on the command line.	
2	Write a simple procedure that increases the basic salary of employees for the given department no by percentage inputted by the user using IN parameter.	
3	Write a procedure that search's whether the given employee id is present or not in the table. If employee is found then show its name otherwise raise appropriate error message (Use both IN and OUT mode variables) and also write a PL/SQL block to call the procedure.	
4	Write a function that returns the square of the given number. Execute the function using separate PL/SQL block and on the command line.	
5	Write a function that returns balance for given account number. (Create ACCOUNT table with ACNO, CNAME, BNAME, BALANCE columns using appropriate datatypes)	

Definition 1:
Write a simple procedure without any parameter that shows user defined message on the screen. Call the procedure using separate PL/SQL block and on the command line.

```
--print msg

SET SERVEROUTPUT ON

CREATE OR REPLACE PROCEDURE promsg

IS

BEGIN

    DBMS_OUTPUT.PUT_LINE('Hello! This is a user-defined message.');

END promsg;

/

--calling

BEGIN

    promsg;

END;

/
```

Definition 2:

Write a simple procedure that increases the basic salary of employees for the given department no by percentage inputted by the user using IN parameter.

```
--increase basic salary

CREATE OR REPLACE PROCEDURE prosal(p_deptno IN
```

```
NUMBER,p_percent IN NUMBER)

IS
BEGIN

UPDATE employee SET

basic_salary=basic_salary+(basic_salary*p_percent)WHER
E deptno=p_deptno;

DBMS_OUTPUT.PUT_LINE('Salary updated successfully for
Department'||p_deptno);

END prosal;

/
```

Definition 3:

Write a procedure that search's whether the given employee id is present or not in the table. If employee is found then show its name otherwise raise appropriate error message (Use both IN and OUT mode variables) and also write a PL/SQL block to call the procedure.

```
--show data and create exception
CREATE OR REPLACE PROCEDURE proemp(xempid IN
NUMBER,xename OUT VARCHAR2)
IS BEGIN
    SELECT emp_name INTO xename FROM employee
WHERE emp_id=xempid;
EXCEPTION
  WHEN NO_DATA_FOUND THEN
  RAISE_APPLICATION_ERROR(-20001,'Employee not found with
  ID '||xempid);
  END proemp;
/

--calling program
 SET SERVEROUTPUT ON
 DECLARE
xname employee.emp_name%TYPE;
 BEGIN
```

```
    proemp(101, v_name);
    DBMS_OUTPUT.PUT_LINE('Employee Name: '||xname);
    EXCEPTION
WHEN OTHERS THEN
DBMS_OUTPUT.PUT_LINE(SQLERRM);
END;
/
```

Definition 4:

Write a function that returns the square of the given

number. Execute the function using separate PL/SQL block and on the command line.

```
--square of the number

CREATE OR REPLACE FUNCTION funsqu(num IN NUMBER)

RETURN NUMBER

IS

result NUMBER;

BEGIN

   result:=num*num;

   RETURN result;

END funsqu;

/

--calling program
```

```
SET SERVEROUTPUT ON

DECLARE

   ans NUMBER;

BEGIN

   ans:=funsqu(5);
   DBMS_OUTPUT.PUT_LINE('Square is: '||ans);

END;

/
```

Definition 5:

Write a function that returns balance for given account number. (Create ACCOUNT table with ACNO, CNAME, BNAME, BALANCE columns using appropriate datatypes)

```
--show balance

CREATE OR REPLACE FUNCTION funbal(xacno IN NUMBER)

RETURN NUMBER

IS

xbalance NUMBER;

BEGIN

SELECT balance INTO xbalance FROM account WHERE acno=xacno;

RETURN xbalance;

EXCEPTION

      WHEN NO_DATA_FOUND THEN
```

```
        RAISE_APPLICATION_ERROR(-20002,'Account not found with number

 '||xacno); END funbal;

/
```
